

This exploded perspective view illustrates the assembly of the electronic device. The components are shown in their relative positions:

- Top Layer (10):** A rectangular plate with a series of parallel ridges or fins along one edge (12). It features two circular openings: a larger one (28) with a central mesh (36) and a smaller one (26) with a central mesh (32). A small rectangular component (34) is positioned near the larger opening.
- Intermediate Layers (20, 22, 24):** Three thin, rectangular plates stacked on top of each other.
- Base Assembly (14):** A rectangular frame or housing. It includes:
 - 15:** Four corner fasteners or screws.
 - 16:** A rectangular mesh or filter component.
 - 18:** A rectangular plate or insert.
 - 40:** Two small cylindrical components, possibly capacitors or sensors, mounted on the base.
 - 41:** A rectangular component, possibly a battery or a microcontroller, mounted on the base.
